PPC

Pay per click (PPC) is an Internet advertising model used on search engines, advertising networks, and content sites, such as blogs, in which advertisers pay their host only when their ad is clicked.

SEO/SEM

Search engine marketing is a form of Internet marketing that seeks to promote websites by increasing their visibility in search engine results. If marketing content does not use their customers' language, the way that they talk and think, even the best websites may fall short of meeting goals for brand awareness, promotion or transaction.

Social Websites

A social network community of people who share interests and/or activities, or who are interested in exploring the interests and activities of others. Social network services provide a variety of ways for users to interact, such as e-mail instant messaging services, and advertisement.

Blogs

Weblogging — or blogging — is taking social networking to new heights. And with the improvements to the technology, the personal journals are now supplying tens of millions of bits of information every day. Now multi-million dollar corporations looking for cheap and effective ways of getting their message out are using the technology to their advantage.

Email Marketing

E-mail marketing is a form of direct marketing which uses electronic mail as a means of communicating commercial or fundraising messages to an audience. In its broadest sense, every e-mail sent to a potential or current customer could be considered e-mail marketing.
