Industry Overview, Pandemic Impact and Recovery

The transportation sector, quite simply, comprises companies that move people, goods or the infrastructure to do so. Here we take a quick look at some of those industries focusing on land transport, and resources that support these companies.

According to the U.S. Environmental Protection Agency, in 2020 the transportation industry produced [37% of emissions](#) with trucks producing 83% of these, making it the largest source contributor to greenhouse gas emissions. To aid in [sustainability](#) efforts through combating emissions, the [Inflation Reduction Act](#) provides incentives for investment in commercial green vehicles. Many trucking companies are fast moving to adopt the [innovation](#) of electric vehicle fleets. FedEx and Amazon made commitments to achieve [net-zero carbon emission](#)

by 2040 and 2030 respectively. However, the American Trucking Association addresses the capital constraints of trucking companies transitioning to electric fleets when [small businesses make up 96% of the industry](#) with fleets of 10 or fewer trucks.

The halt to manufacturing caused by shelter in place orders to mitigate the spread of [COVID](#) impacted many areas of the transportation industry. Even before the start of the [pandemic](#), the trucking industry faced [staffing shortages](#). Through 2021 and 2022, as many industries faced [labor shortages](#), [driver shortage projections](#) continued at high levels. Understanding they key role of trucking in the U.S. economy, the U.S. Department of Transportation and the U.S. Department of Labor launched a [Trucking Action Plan](#) to address the various challenges to attract and retain drivers to the industry as well as support the small businesses that make up this sector.

Efforts also impacted the [public transit ridership](#) and even with most people returning to the workplace, continues to face challenges in returning to pre-pandemic ridership levels.

Transportation Industry Resources

Industry Data

- [City Mobility Index](#) - cities mobility scores from Deloitte

- [Bureau of Transportation Statistics](#) - offers statistics and analysis on numerous transportation sectors
- [Freight Management and Operations](#) - provides links to major sources of national freight transportation data
