Getting back to business after a disaster depends on preparedness and resiliency planning done today. Small business owners invest a tremendous amount of time, money and resources to make their ventures successful, and yet, while the importance of emergency planning may seem self-evident, it often gets put on the back-burner in the face of more immediate concerns. Disasters come in all shapes and sizes, from natural disasters such as hurricanes and wildfires, to other disasters such as electrical fires, burglaries and cyber attacks. For small business owners, being prepared can mean staying in business following a disaster. An estimated 25 percent of businesses do not reopen following a disaster, according to the U.S. Small Business Administration.

The materials and resources presented here can help small businesses make plans to recover from financial losses and business interruption and to protect their employees, the community and the environment.
Pandemic Small Business Resources & Support

- **SBDCNet’s COVID-19 Small Business Resources** – Federal, State and Private resources and assistance to support small businesses with COVID-19.
